Manish Kumar Gupta

Associate Manager - Design & Development
200, Jawahar Puram, Mangala Vihar 1st, PAC-37, Kanpur, UP - 208015
Email: manish.tech@gmail.com | **Mobile**: +91 9935309000

Objective

To contribute to a professional environment within a growing organization, leveraging my expertise in customer handling, product visualization, and design, while continuously improving organizational strategies and personal development.

Professional Experience

Assistant Manager - Design & Development
MKU Ltd. | April 2008 – September 2024

- Led the design and development of armoring solutions across multiple platforms, including aircraft, land vehicles, and sea vessels.
- Utilized AutoCAD, SolidWorks, and CATIA to develop detailed designs from initial concepts through to final production.
- Designed and engineered armor kits and installation attachments, ensuring compliance with quality standards and cost parameters.
- Collaborated directly with customers to provide technical support and develop tailored solutions for custom armoring projects.
- Supported production teams at all stages of product development to ensure timely and successful project delivery.
- Wrote detailed product technical specifications for customers, ensuring that all design and functionality requirements were clearly communicated.
- Wrote detailed technical specifications to guide design, manufacturing, and installation processes, ensuring clarity and compliance with industry standards.

CAD & CorelDRAW Instructor
VCEC | October 2006 – April 2008

- Delivered comprehensive training on **CAD** and **CorelDRAW**, focusing on practical applications in graphic and engineering design.

Freelance Graphics Designer
October 2006 – April 2008

- Provided graphics design services for international clients, specializing in **offshore online projects** using **CAD** and **CorelDRAW**.

Graphics Designer
Technocraft Creations | November 2001 – June 2006

- Created graphics and engineering design solutions for clients in a variety of industries.

Key Skills

- **Software Proficiency**: AutoCAD, SolidWorks, CATIA, CorelDRAW, Adobe Photoshop, MS Word, Excel, PowerPoint

Core Competencies

- **2D Drafting**: Skilled in creating precise 2D drawings for design projects.
- **3D Modeling**: Proficient in developing detailed 3D models using advanced CAD software.
- **Nesting**: Experienced in optimizing layouts for material efficiency.
- **Costing**: Expertise in project costing and budgeting to ensure financial feasibility.
- **Project Planning**: Ability to develop comprehensive project plans and timelines.
- **Quality Parameters**: Skilled in setting and maintaining quality standards for design projects.
- **Drawing Approval**: Experienced in obtaining necessary approvals for design drawings.
- **Technical Clients Meetings**: Proficient in conducting technical discussions with clients to address their needs.
- **Specification Writing**: Capable of writing detailed specifications for projects and products.
- **Design of Armor Kits and Installations**: Expertise in designing effective armor kits and overseeing their installation on various platforms.
- **Product Visualization**: Strong ability to create visual representations of products for better understanding and presentation.

Major Projects

Aircraft Armoring

- MI-17, MI-8, CH-47, CH-53, Bell Helicopters, Eurocopter Helicopters, Sikorsky Helicopters

Land Vehicle Armoring

- Tata Bus, Mahindra Scorpio (SUV), BMP-2, Army Turret, Swaraj Mazda Bus

Sea Vessel Armoring

- RIB (Rigid Inflatable Boat), Fast Patrol Boat (Aluminum & FRP), Ships

Land Armor Applications

- Guard Rooms, Bulletproof Mobile Morcha (Shield)

International Experience

- **Sri Lanka**: FRP boat armoring
- **Vietnam, Singapore, Tunisia**: Aluminum boat and cash van armoring
- **Germany, South Korea, Japan**: Aircraft and boat armoring concept design
- **Philippines, UAE**: Frigate armoring and training for armor panel manufacturing
- **Brazil, Myanmar, Finland, France, Thailand**: Aircraft, SUV, and engine armoring projects

---

Responsibilities

- Design and development of armor panels and kits
- Installation of armor on various platforms
- Define quality parameters and margin control
- Conduct customer meetings for technical discussions
- Support production team throughout product development

As a specialist in armor attachment design for aircraft and boats, I lead the comprehensive development of fixtures from Preliminary Design Review (PDR) to Critical Design Review (CDR) and final installation. My role encompasses a range of responsibilities, including:

Design and Implementation

- **Requirement Analysis**: Collaborating with clients and engineering teams to define technical specifications and operational constraints.
- **Concept Development**: Creating initial 2D and 3D models using CAD software (AutoCAD, SolidWorks, CATIA) that consider load capacity and material selection.
- **Feasibility Studies**: Performing stress analysis and weight distribution checks to ensure design integrity.

- **Detailed Design Finalization**: Refining designs based on feedback, ensuring precise dimensions and material specifications for high-stress conditions.
- **Simulation and Testing**: Validating fixture durability and reliability under real-world scenarios.
- **Compliance Assurance**: Meeting all regulatory safety standards, including fire and impact resistance.
- **Prototype Development and Installation Supervision**: Overseeing prototype testing and installation to guarantee proper fitment and performance.
- **Quality Control and Documentation**: Conducting inspections and preparing comprehensive manuals for client handover.

Customer Handling

In my current role, customer handling is a critical responsibility that encompasses managing client relationships, understanding customer needs, providing technical solutions, and ensuring customer satisfaction throughout the project lifecycle:

1. **Initial Client Engagement**:
    - **Understanding Requirements**: Engaging clients to gather specific needs and expectations for armoring solutions.
    - **Technical Consultations**: Simplifying complex engineering concepts to guide clients through design options and safety standards.
    - **Proposal Development**: Preparing technical proposals that align expectations before project initiation.
2. **Ongoing Communication and Relationship Building**:
    - **Regular Updates**: Keeping clients informed with frequent communication about project progress and milestones.
    - **Feedback Incorporation**: Actively integrating client feedback into the project to build trust.
    - **Conflict Resolution**: Addressing client concerns promptly and effectively to maintain satisfaction.
3. **Technical Support and Solutions**:
    - **Problem Solving**: Offering solutions to design or functionality challenges that arise during the project.
    - **Training and Support**: Coordinating training for clients on product use and installation.
    - **After-Sales Support**: Providing ongoing assistance to ensure client satisfaction post-delivery.
4. **Project Management and Coordination**:
    - **Timely Delivery**: Ensuring design and manufacturing processes stay on schedule.
    - **Budget Management**: Keeping projects within budget and communicating any cost variations to clients.

    - **Customer-Centric Adjustments**: Managing changes based on client requests while maintaining quality.
5. **Ensuring Customer Satisfaction**:
    - **Delivering Quality**: Ensuring all products meet technical and safety standards.
    - **Post-Project Review**: Gathering feedback to identify improvement areas for future projects.
    - **Building Long-Term Relationships**: Keeping in touch with clients to foster ongoing trust and business opportunities.
6. **Cultural Sensitivity and International Client Engagement**:
    - **Adapting to Diverse Needs**: Managing relationships with clients from various countries, including Germany, Brazil, South Korea, and France.
    - **On-Site Support**: Traveling to client sites for project discussions and installations, enhancing trust in our services.

Education

- **B.A.** | CSJM University, Kanpur

Awards & Recognition

- **Innovation Award** | *MKU*
  Awarded for successfully implementing innovative solutions for aircraft armor, achieving installation on the first attempt.
- **Outstanding Performance Award** | *MKU*
  Recognized for completing multiple tasks ahead of schedule, demonstrating exceptional efficiency and commitment.

Strengths

- Effective collaboration with diverse teams
- Excellent planning and execution of detailed designs
- Quick learner, adaptable to change and pressure
- Strong leadership skills with a positive attitude

Languages

- English, Hindi

Personal Information

- **Father's Name**: Mr. M.L. Gupta (Ex-Defense Employee)
- **Date of Birth**: 31 July 1985
- **Passport No.**: Z4241805 (Schengen Business Visa valid till 2027, Brazil Business Visa valid till 2028)
- **Nationality**: Indian
- **Notice Period**: Available for immediate relocation

Declaration

I hereby declare that all the information provided is true and accurate to the best of my knowledge.
